Professional Summary

Highly motivated Full-Stack Developer and Computer Science senior specializing in web application architecture, high-performance database optimization, and software-defined networking. Demonstrated track record of managing and visualizing massive datasets exceeding 30 million records. Adept at implementing secure network layers and building responsive user-centric applications within fast-paced corporate environments.

Technical Skills

- Frontend Architecture:** React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Shadcn UI, HTML5/CSS3
- Backend & Databases:** Node.js, Express.js, Supabase, DuckDB, Parquet Files, SQL, MongoDB, localStorage
- Networking & Security:** Software Defined Networking (SDN), Ryu Controller, OpenFlow, Cryptography (SRP, E2EE)

Professional Experience

Full-Stack Developer Intern SmartX (Nataj Hub) – Jadriya, Baghdad, Iraq (On-site)	Summer 2025
- Collaborated within a cross-functional development team to build, optimize, and deploy full-stack web features using React.js and Node.js. - Participated in daily technical sprints, code refactoring, and automated troubleshooting workflows to enhance application performance.	

Technical Projects

High-Performance Flight Data Dashboard – React.js, DuckDB, Parquet, Data Analytics
Engineered an analytical system integrating DuckDB and columnar Parquet files to query and aggregate over 30 million records with sub-second performance.
Student Attendance Tracking System via QR Code – React.js, Express.js, Shadcn UI, MongoDB
Architected a full-stack secure logging system utilizing dynamic, time-sensitive QR codes and robust backend server validation to prevent proxy attendance.
Smart Reforestation Campaign Platform – React.js, Tailwind CSS, Mapping APIs
Designed an environmental sustainability dashboard for the 'Reforest Iraq' initiative, visualizing automated drone flight paths and optimal target zones.
Municipal Complaints & Service Portal – Vanilla JavaScript, HTML5/CSS3, Express.js
Built a lightweight citizen service platform utilizing a zero-dependency frontend paired with an Express.js backend for optimized request processing.

Education

Bachelor of Science in Computer Science | University of Technology, Iraq – Baghdad, Iraq
Specialization: Computer Networks & Web Development (Expected Graduation: 2026)
